

## Firmware Update

**Install only original firmware which has been released by SPAUN electronic GmbH & Co.KG!**

To carrying out the execution of the firmware update please following carefully all items in turn.

- Download the latest firmware version 609\_vX.X.ZIP from our website (www.spaun.com)
- Connect an USB-memory stick to your PC
- Unzip the file 609\_vX.X.ZIP on the USB-memory stick
- On the USB-memory stick a Folder AUTORUN was created, which contains the necessary files.
- Disconnect the USB-memory stick from the PC. Take care of „safely remove hardware“
- Switch on the SPAROS 609 and take care that the battery capacity is at least 30%! If this is not the case use the Power adapter or charge the battery before starting the update.

- **ATTENTION:**

If the SPAROS will be switched off, because of not enough battery capacity during the firmware update, the device will be destroyed! The company SPAUN electronic GmbH & Co.KG assumes no liability in the event that the device has been destroyed due to a not proper firmware update.

**PLEASE STRICTLY FOLLOW THE INSTRUCTIONS!**

- Switch on the SPAROS 609
- Connect the USB-memory stick to the SPAROS 609. The updating process will start automatically
- Select „Ja“ to install the firmware update.

- **CAUTION:**

1. Do not power off the device during the firmware update!
2. Don't disconnect the USB-memory stick during the firmware update!

2.

The screen shows a USB stick icon on the left, a green arrow pointing right, and a device icon on the right. Below the icons, the text 'FIRMWARE UPDATE' is centered. Underneath, the instruction 'Updatevorgang läuft / Gerät auf keinen Fall ausschalten' is written in red. A small mouse cursor icon is positioned over the text.

**FIRMWARE UPDATE**

Updatevorgang läuft / Gerät auf keinen Fall ausschalten

3.

The screen shows a USB stick icon on the left, a green arrow pointing right, and a device icon on the right. Below the icons, the text 'FIRMWARE UPDATE' is centered. At the bottom, two lines of blue text provide instructions: 'Bitte USB-Stick entfernen und Gerät ausschalten...' and 'Bitte den Ordner 'Autorun' vom USB Stick entfernen...'.

**FIRMWARE UPDATE**

Bitte USB-Stick entfernen und Gerät ausschalten...  
Bitte den Ordner 'Autorun' vom USB Stick entfernen...

- When the firmware update is completed, disconnect the USB-memory stick and switch off the device.
- Please erase the AUTORUN folder from the USB-memory stick.
- By switching on the SPAROS 609 the new firmware version is installed and can be used.
