

New functions in firmware

Version 1.7 – September 2009

- **SAT-CR mode** has been added (EN 50494) with automatic detection of slots.
- Cursors added to the mini spectrum to show noise reference and power calculation.
- Background color can be selected for the screens in **SPECTRUM** and **MEASURING MAP mode**. The colors are available: black (standard), gray and white.
- Satellite identification (NIT) on the **CHECK-SAT Mode**.
- New utility to calculate the dish antenna positioning, depending of where you are (longitude and latitude).
